

LISTING OF CLAIMS

This Listing of Claims will replace all prior versions and “Listings of Claims” in the application:

1. (Currently Amended) A method for previewing fonts on a computer in a font preview display area, the method comprising the steps of:

displaying text in a first font format in the font preview display area, wherein the text includes plural characters in a first order; ~~and~~

concurrently displaying the same text, including the same plural characters in the first order, in a second font format differing from the first font format in the font preview display area wherein

the text displayed in the first font format and the second font format includes the same text in a single language, and

the text displayed in the first font format and the second font format is displayed in a paragraph display preview format or waterfall display preview format, wherein the paragraph display preview format includes displaying the text in a multi-line paragraph; and

providing a preview format selection option in the font preview display area, wherein the preview format selection option allows switching between a plurality of preview formats in which the text is displayed, the plurality of preview formats including the paragraph display preview format and the waterfall display preview format.

2. (Canceled)

3. (Original) The method according to claim 1, wherein the text is displayed in alphanumeric order.

4. (Currently Amended) The method according to claim 1, wherein ~~said steps of~~ displaying the text includes displaying the text in response to a real time input.

5. (Previously Presented) The method according to claim 1, wherein the first font format differs from the second font format in that the first font format includes a different font type as compared to the second font format.

6. (Previously Presented) The method according to claim 1, wherein the first font format differs from the second font format in use of different font sizes.

7. (Canceled)

8. (Original) The method according to claim 1, wherein the first font format and the second font format are part of a predefined font group.

9. (Currently Amended) In a computer system having a graphical user interface including a display and a user interface selection device, a method of providing and selecting from the display, comprising the steps of:

receiving a selection of at least a first font and a second font;

displaying text in the first font in a font preview area of the display, wherein the text includes plural characters in a first order; ~~and~~

concurrently displaying the same text in the font preview area of the display in the second font, wherein the concurrently displayed text includes the same plural characters in the first order and wherein,

the text displayed in the first font and the second font includes the same text in a single language, and

the text displayed in the first font and the second font is displayed in a paragraph display preview format or waterfall display preview format; and-

providing a preview format selection option in the font preview area, wherein the preview format selection option allows switching between a plurality of preview formats in which the text is displayed, the plurality of preview formats including the paragraph display preview format and the waterfall display preview format.

10. (Currently Amended) The method according to claim 9, further comprising ~~the steps~~ of:

receiving text input; and

wherein the displaying includes concurrently displaying the text input in the first and second fonts in the font preview area in real time.

11. (Previously Presented) The method according to claim 9, wherein the first and second fonts are from one predefined font group.

12. (Previously Presented) The method according to claim 9, wherein the first and second fonts are different forms of the same font.

13. (Currently Amended) The method according to claim 9, further comprising ~~the steps~~ of:

receiving a selection of a font size; and

displaying the text in the first and second fonts in the font size in the font preview area in real time.

14. (Currently Amended) The method according to claim 9, further comprising the step of displaying the text in the first and second fonts in a plurality of font sizes concurrently in the font preview area.

15. (Previously Presented) The method according to claim 9, generating a print output including the text as displayed in the first and second fonts in the font preview area.

16-18. (Canceled)

19. (Previously Presented) The method according to claim 1, further comprising:
concurrently displaying the same text in the font preview display area in a third font format, wherein the text displayed in the third font format includes the same plural characters in the first order, and wherein the third font format differs from the first and second font formats.

20. (Previously Presented) The method according to claim 19, wherein the first font format, the second font format, and the third font format constitute different font types.

21. (Previously Presented) The method according to claim 19, wherein the first font format, the second font format, and the third font format constitute different font sizes.

22. (Previously Presented) The method according to claim 19, wherein the first font format, the second font format, and the third font format are part of a predefined font group.

23. (Canceled)

24. (Previously Presented) The method according to claim 9, further comprising:
concurrently displaying the same text in the font preview area of the display in a third font, wherein the text displayed in the third font includes the same plural characters in the first order, and wherein the third font differs from the first and second fonts.

25. (New) The method of claim 1, wherein the text is displayed in the first font format and the second font format in a waterfall display format configured to display the text in a plurality of predefined font sizes concurrently for each of the first and second font formats.

26. (New) The method of claim 25, wherein the text is displayed in the plurality of predefined font sizes in the first font format in at least one of an: increasing font size arrangement and a decreasing font size arrangement.

27. (New) The method of claim 1, wherein the text is displayed in the first font format and the second font format in the font preview display area without installing the first and second font formats in an installed fonts database.
